

## WHO?

Specially designed for NUS students who are enrolled in one or more modules of which they do not have friends in, this app promotes mutual learning by helping these students to find peers enrolled in the same modules to organise sessions to study together.

## WHY?

Students may not have planned with their friends to take certain modules together or may have drawn the short end of the stick during NUS' module registration period. These students are unlikely to have a group of friends who take the same modules to study with during crucial times.

## HOW?

Register for an account using your NUSNET email

Join or create study sessions for your allocated modules

Rate the study sessions you go for

Decide if you want to join a study session based on other students' ratings

Make new friends and find new study buddies

## FEATURES

Choose a username of your liking

Update your profile's details to let other students know who you are

View other students' ratings and their study session history

Update your module selection every semester

Compatible for both iOS  and Android
